

TERRAIN FORGE

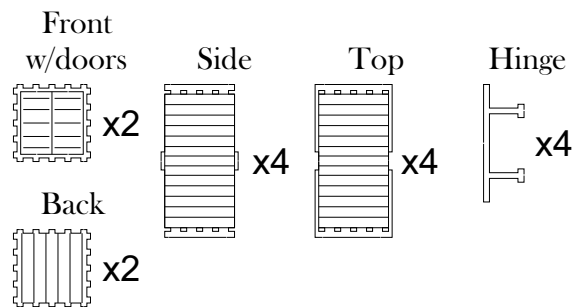

You will need:

- .Wood Glue
- .Craft Knife
- .Sandpaper

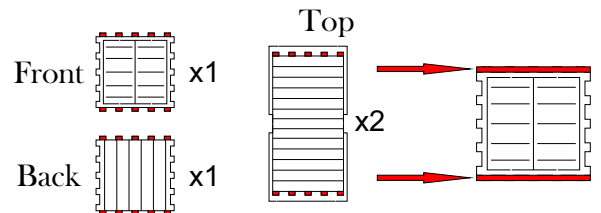

How To Build: WTC Containers

Always test fit pieces before applying any glue. Lightly sand the places where you wish to apply glue, this helps to create a stronger bond between the two surfaces. Always use a strong wood glue, craft pva glue is not recommended.

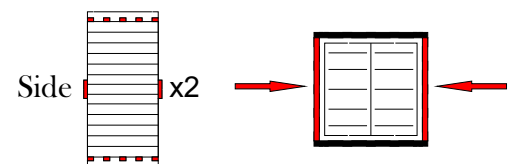

- 1: Carefully remove all the pieces from the sprue, making sure to be extra careful on the smaller pieces. We advise cutting the tabs with a craft knife on the smaller, more delicate pieces.

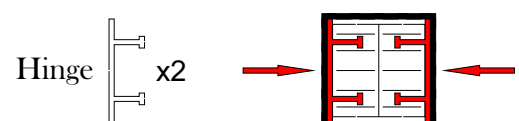

- 2: Take the front and back pieces, and slot them into the holes on the top and bottom pieces.

- 3: Take the two side pieces, and slot them onto the tabs on the front and back pieces.

- 4: Glue the hinge pieces in place, making sure to glue them to both the doors and the frame

- 5: Your container is now complete
